**ABSTRACT**

B' A method and an apparatus for processing information stored on a storage medium, wherein a graphical user interface is presented to allow a user to quickly and easily determine what programs may be available on the storage medium. The user interface displays what programs and portions of programs are possible on the storage medium according to a particular standard, and what programs and portions of programs are actually available from a particular storage medium to allow the user to more easily determine the content of the storage medium while avoiding confusion. ✓
